### Chicago Colocation, Dedicated Servers, and Cloud Hosting

Steadfast Networks is a Chicago based IT infrastructure provider that specializes in highly flexible **cloud environments**, **dedicated servers**, **Chicago colocation**, **New York colocation** and **managed colocation** services out of our fully redundant **data centers in Chicago and New York** that have been audited according to SSAE16 (replacement for SAS70) standards. We have been providing quality service since 1998 and pride ourselves in providing our customers with high quality, flexible, and exceptionally reliable services at a very reasonable price. While our services are geared towards small and medium businesses, Internet/network service providers, and the **financial sector**, we are able to accommodate customers of all sizes, from a highly flexible **Cloud Hosting** account to a complex multi-gigabit **managed colocation** configuration. The focus is to simplify your life by allowing us to handle your IT infrastructure issues and problems, allowing you to focus on your core business while making IT a true asset.
